# touch screen technology

more than just a drink selection

Our touch screen technology gives more than just the ability to select your drink. Based on the Microsoft Windows operating system with our custom built software installed, the HLF Touchscreens provide features far beyond those of a humble coffee machine.

## User friendly experience

Touch screen drink selection makes choosing and ordering your drink an easy and fun experience.

## Simplicity

The HLF's are perfect for the self-service environment or for staff use with minimal training.

## Advertising platform

The built in video player can be used to show your latest TV advert, in store promotion or can even be used by your staff to watch our video cleaning guides.

## Anywhere access

With wired or Wi-Fi internet access, you can connect to your HLF Touchscreen from anywhere in the world. This allows you to check drink counters, change machine settings, upload your latest video advert or even send information by email.

## Remote maintenance

With the internet connection our engineers can dial in, perform diagnostics and work on the machine remotely, making sure that any necessary downtime

Our in-built video player allows you to show your latest tv adverts, instore offers or even our helpful cleaning videos right there on the touch screen. With remote access via the internet and 8GB onboard memory, your videos can be simply updated from anywhere in the world.
